

Your schools have got their own websites, now get them an App from Zero Cost

Over 95% of people now own a smartphone, spending 75% of their smartphone time on Apps, so if you haven't got an App you're probably missing a key way of communicating with them.

With less time at your school gates, parents can sometimes feel they are getting less communication from their child and the schools at a very important time in their child's education, this is when you need an App. One smart App for each of your schools, which can bridge that communication gap. An App with easy access to the schools calendar on their smartphone, messages to keep parents informed about things that are going on in their schools, plus links to all the third-party systems that are used in your schools.

[DEMO & PRICE PLANS](#)

Students, Governors, Teachers and all stakeholders can also get in on the action with the App giving them direct access via their smartphone to all the Apps and websites that are used in your schools and in your MAT as well as keeping them up-to-date with events and news. Using an App and messaging can save time and money for you and be more convenient for everyone.

What about the cost though? As a team of Governors, Teachers and EdTech experts, we understand completely budgetary pressures. That's why we have a range of prices from an App with a unique Zero Cost option through to an App that not only can send your emails but also combines cutting-edge free App/Push Messaging with SMS text messages saving money against your existing 'old school' text message system.

Benefits for Multi-Academy Trusts (MATs)
